

MONMOUTH COUNTY SHERIFFS OFFICE COMMUNICATIONS DIVISION

EMS COMMUNICATIONS PLAN

INTRODUCTION

Within Monmouth County, Sixty-five First Aid Squads provide basic life support and transportation of patients. The EMS force is made up of primarily volunteer squads, but does include ten paid entities. These squads operate on both full and part-time basis. The Communications Division of Monmouth County Sheriff's Office acts as the Public Safety Answering Point (PSAP) for forty-five communities, two college campuses, two military installations, and one National Park. Emergency calls are received via 9-1-1 and relayed to local communications centers for dispatch, while thirty-two volunteer, and eight paid squads are directly dispatched by Monmouth County.

The Communications Division also acts as the coordination point for mutual aid resources. Mutual aid plans have been developed by the County EMS Coordinators in conjunction with Monmouth County's First Aid Squads, and are implemented as needed by the respective squads, EMS Coordinators, and/or Emergency Management Coordinators.

Effective communications during emergencies, eliminate confusion, move resources efficiently, provide a professional response, and ensure appropriate patient care, thereby reducing the loss of life. When an emergency occurs, requiring mutual aid resources, local dispatch centers may become deluged with radio transmissions and telephone calls. This often overwhelms the local centers, and may cause a delayed response or a forgotten message. Also, local centers often do not have the ability to communicate with the various agencies responding to the mutual aid call, further complicating the situation.

The need for standardization cannot be overemphasized. Standard operating procedures save time, reduce confusion, and eliminate errors and will assist all concerned in providing timely and predictable reactions to emergency situations

True mutual aid is not accomplished by randomly calling for assistance from bordering agencies. Instead, a coordinated response of pre-planned units is the only way to efficiently provide service and eliminate stripping areas of emergency service. Communities faced with a major emergency, or situations that potentially create the movement of many units, must be controlled from the onset. The most effective way to provide these services is for a centralized communications center to coordinate the movement of this equipment in cooperation with the County's EMS Coordinators.

Monmouth County's EMS Coordinator and Deputy Coordinator are assigned as part of Monmouth County's Office of Emergency Management (OEM). These coordinators work closely with the OEM in the planning and implementation of Monmouth County's disaster plans. These coordinators also assist Monmouth County's Homeland Security Team in preparing our county for acts of terrorism, and other major incidents. Additionally, the County EMS Coordinators and Deputy

EMS Coordinator participate in statewide EMS Planning Initiatives with the other counties, as well as the New Jersey EMS Task Force.

Enclosed are radio procedures and mutual aid guidelines that should be followed by all BLS and ALS agencies on an emergency, as well as routine basis.

COUNTY EMS CHANNEL LINEUP

Monmouth County utilizes a mix of conventional and P25 trunked channels for its EMS operations. For paging, tones and dispatches are sent out over eDispatch as well as channels that transmit over towers throughout the county.

EMS NORTH **RESPONSE CHANNEL**

- ✓ Direct Communications to County Dispatch.

EMS CENTRAL **RESPONSE CHANNEL**

- ✓ Direct Communications to County Dispatch.

EMS SOUTH **RESPONSE CHANNEL**

- ✓ Direct Communications to County Dispatch.

LAN RESPONSE **RESPONSE CHANNEL**

- ✓ Direct Communications to County Dispatch.
- ✓ (L)ong Branch, (A)sbury Park, (N)eptune

EMS COUNTYWIDE **153.755 MHz.**

- ✓ EMS Ground.
- ✓ Interagency Communications.

EMS OPS 2 **155.355 MHz.**

- ✓ EMS Ground.
- ✓ Interagency Communications.

MONMOUTH EMS 2 **155.340 MHz.**

Ambulance to Hospital
County to Hospital
Hospital to County
Hospital to Hospital

A.N.S.W.E.R. OPERATIONS **155.355 MHz.**

Regional Water Rescue Dispatch
Regional Water Rescue Operations

MIDDLETOWN EMS ALERTING **154.295 MHz.**

Middletown EMS Dispatch

MIDDLETOWN EMS OPERATIONS **155.550 MHz.**

Middletown EMS Operations

SPEN 4 **153.785 MHz.**

Available to State, County, and Local Public Safety Agencies. To include: Fire, Emergency Medical, and Emergency Management. It provides a common radio channel between Law Enforcement and other Public Safety Agencies.

UTAC 6 and UTAC 22

471.3875 MHz.

Available to Monmouth County Communications Dispatch and the EMS Coordinators for Communication between Monmouth County and the EMS coordinators. This channel is not available to individual squads and officers.

State 800 Mhz EMS Radio

Available only to New Jersey State Police, County, paramedic and hospital dispatch centers and EMS Mobilization Coordinators for disaster coordination and communication. This channel is not available to individual squads and officers.

NJICS Interoperability Frequencies

These frequencies will be available for use by local and county agencies on an as needed basis, and only when assigned by the Coordinators or the County.

VHF	VCALL – 155.7525 (Simplex)	County EMS Staff
	VTAC 1 – 151.1375 (Simplex)	1 st District Squads

	UTAC 6 - 471.3875	
	UTAC 22 - 471.3875	

RADIO PROCEDURES

- All agencies shall operate mobile radios under the F.C.C. license issued to Monmouth County, New Jersey. All agencies operating under the county radio license must sign radio agreements with the county. If your agency has not signed an agreement, please contact the County by calling 732-431-6400 X1625.

- When calling Monmouth County on an EMS channel, address the County with the appropriate EMS channel number and your county radio ID number:

Example: North Response from 33-56

- EMS channels shall be used only to transmit communications essential to related activities.
- All communications are to be professional, brief, and to the point.
- Phrases such as thank you, please, when you have a minute, etc. are unnecessary and are not to be used.
- Never transmit a person's first name or nickname. If it is necessary to identify someone on the air, transmit their rank and last name,

Example: Captain Jones

- All F.C.C. Rules and Regulations will be followed at all times.
- Time checks shall be completed on the hour, and half hour in accordance with F.C.C. Rules and Regulations.
- Maintain radio silence when:
 - When within 200 yards of a suspected explosive device.
 - A transmission will interfere with another already in progress.
 - A SIGNAL ONE-ONE-ONE has been transmitted.
 - Advised to stand by.
- Communications on EMS channels shall be limited to:
 - Calls for service
 - Unit transient status
 - Communications essential to normal EMS operations.
- Messages are classified in two categories, Urgent and Routine, with priority in that order. The radio operator shall determine the priority of all radio calls.

When a unit is calling to report an emergency, transmit EMERGENCY after transmitting the channel and unit number.

Example: North Response from 43-57 EMERGENCY

- **URGENT CALLS**
 - Dispatch and emergency status
 - Emergency Messages
- **ROUTINE CALLS**
 - Radio Checks
 - Unit non-emergency status
- The use of slang, cursing, or laughing on the air is prohibited.
- Questions concerning procedures are not to be discussed over the air. If a procedure must be clarified, use a telephone.
- All radio calls will receive immediate attention.
- When dispatching a call for service, or requesting assistance to an incident always give a cross street.
- Ten Codes or signals shall not to be used on Monmouth County EMS Channels. Use plain English:
 - Example 1557 In Service (not 1557 10-8)

MDT POLICY

With the introduction of Mobile Data Terminals into Fire and EMS vehicles, it is important for personnel to not become complacent with properly updating the communications center via radio when updating information in Spillman, an example being putting an ambulance in service on the MDT but not calling it in via the radio to dispatch. Without a verbal confirmation that an ambulance in service, it is the policy of the communications center to tone out further alerts or seek verbal confirmation over the air as to whether or not an ambulance is actually in service to a call.

MONMOUTH COUNTY NUMBER SYSTEM

- Monmouth County utilizes a unique radio numbering system that identifies the town or agency and unit type. The number may be a four or five digit type.

37	2	56
Town/Agency	Organization	Unit Type

- The first two digits identify the town or agency. The third digit, 37 - **2** – 56, this is the organization identifier, and the last two identify the unit type.
- Each squad is identified by a four digit number in which the first two numbers identify the town or agency, **2521**, (Long Branch), and the last two digits identify the squad, 25**21**, (Long Branch First Aid Squad), 25**22**, (Elberon First Aid Squad). When transmitting a squad number transmit as:

Twenty-five twenty-one; not Two – Five – Two – One.

MUTUAL AID COMMUNICATIONS

- The first unit calling the Monmouth County Communications Center for mutual aid shall transmit the following information:
 - Incident Commander Unit Number
 - Location of the incident
 - Type of emergency
 - Approximate number of patients
 - Number of ambulances needed
 - Number of MICU'S needed
 - Extrication needed
 - Special services needed (Jemstar, etc.)
 - Staging area
- If the mutual aid call originates from a local dispatch center, the same procedure as above is to be followed, but the local dispatcher shall call 732-577-8700.
- Once communication is established on North/Central/South or other response frequency, contact with Monmouth County shall be kept throughout the duration of the emergency.
- The Monmouth County Communications Center will:
 - Notify mutual aid agencies as requested, or from appropriate mutual aid plans.
 - Notify the EMS Coordinator when three communities or five First Aid Squads are involved in an incident.
 - Secure the status of hospitals and relay to the on site EMS Command. Hospitals will be notified of the incoming patients after receiving the information from EMS Command.
 - Support Agencies such as American Red Cross or Salvation Army may be notified.
 - If the situation warrants, or upon request, a mobile communications unit (Field Comm) may be dispatched to assist the EMS Branch at the scene. EMS Coordinators shall respond with the Field Comm's to coordinate the movement of EMS units.

- Units responding onto the Garden State Parkway shall contact Monmouth EMS 1 with the following information:
 - Location of Incident
 - Type of emergency
 - Approximate number of injuries
 - Any other services needed

This should be done each and every time a unit responds on to the Parkway, even if it is in their own coverage area.

- Patient reports, directions, or any other lengthy communications to or from a unit and the Communications Center shall be transmitted on the designated response frequency.
- When a unit is responding on a mutual aid call, whether routine, or major, the unit shall contact Monmouth County, on the areas response frequency with the following information:
 - Location to which they are responding.
 - Arrival on location
 - Transport to the hospital (information on number of patients and severity of injuries, only if this has not been given to EMS Command.)
 - Arrival at the hospital.
 - When available or complete.
 - When switching back to local frequency.

NOTE – See EMS - Annex #2 for Garden State Parkway Response Plan

- All MED-E-VAC requests shall be requested and coordinated through the Monmouth County Communications Center. The County Communications Center shall coordinate the landing of the helicopter, with the First Aid Squad, the Fire Department landing Zone Coordinator (LZC) and the helicopter itself. All MED-E-VAC communications will be done on Fireground 3 (154.280 MHz) or Fireground 4 (154.965 MHz).

MOBILE COMMUNICATION'S UNIT

The Monmouth County Sheriff's Office, Communications Division has Two Mobile Communications units available for service to all Monmouth County Emergency Service agencies.

The Field Comm Unit will respond automatically to the following incidents:

- ☐ When requested by an Agency, Officer in Charge, or County Official
 - ☐ Bomb Threat with building evacuations at Monmouth County buildings
 - ☐ Mass Casualty Incidents involving 6 or more first aid squads
 - ☐ All EMS Mobilization activations where a Monmouth County EMS staging area is established. **(See EMS Annex #4 for Staging Area Locations)**
 - ☐ Emergency Responses involving the Sheriff's Office Dive Team
 - ☐ Fires or other large scale incidents at Freehold Raceway Mall or Monmouth Mall
 - ☐ On Third Alarms with a minimum of 5 or more towns involved. (At the discretion of the Monmouth County Dispatch Operations Supervisor.)
 - ☐ Automatic response on all Third Alarms
 - ☐ Fatal Fire
 - ☐ Certain Hazardous Materials Calls
 - ☐ Airplane Crashes
 - ☐ Mass Casualty Incidents
 - ☐ Major life threatening incidents such as Hotel, Hospital, Nursing Home, and High Rise fires.
 - ☐ All Emergency MOCERT Activations
-
- ☐ Field Comm's are available for drills and training sessions upon request. Contact the Communications Supervisor to request a unit for these events.
-
- ☐ When there is a Field Communications Unit on location, the EMS officer in charge (OIC) shall report to the Field Comm and remain with the unit until the incident is complete. This EMS officer shall work in conjunction with the County EMS Coordinator in making decisions concerning incident handling including:
 - ☐ Number of Ambulances needed
 - ☐ Type of extrication needed
 - ☐ Med-e-vac units needed
 - ☐ Hospitals to be involved
 - ☐ Staging Area
 - ☐ Coverage of normal response area's
-
- ☐ Radio equipment in the Field Comm Units include a variety of equipment that enable communications on all County wide channels, State, Marine, and most local channels.

- Each unit carries a minimum of 12 portable radio's (An additional 50 portables are available if needed), spare radio batteries, and Cellular telephone equipment.
- Once on location, the Field Comm becomes YOUR on scene command communications center. All communications should be directed to the Mobile Command Unit instead of the County Communications Center, or local Dispatch Center.
- Portable radios, on a separate channel, are available to any emergency agency within Monmouth County. The portables can be used to coordinate triage, staging, and decontamination areas or provide additional radio channels for command, traffic or crowd control, etc.

HOSPITAL DIVERT GUIDELINES

The following is the hospital diverts terminology to be used by Monmouth and Ocean County hospitals starting in the spring of 2002:

- **ED Divert** – The hospital emergency department cannot accept any additional patients transported by ambulance.
 - **Note** – An ED Divert should end automatically two hours after it was called. All other diversions shall end four hours after being called.
- **Full Divert** – The entire hospital including the ED is unable to admit any additional patients (Walk-in, ambulance, critical care, general admission)
- **Critical Care Divert** – No Intensive Care Unit (ICU) beds or critical/coronary care units (CCU) beds are available.
- **Special Services Divert** – Ambulances carrying patients requiring specialty services (obstetrical, pediatric, substance abuse, etc) must be diverted. Burn Patients should never be diverted from a burn center, and trauma patients should never be diverted from a trauma center.
- **Facility Divert** - Hospital cannot take any patients due to fire, power outage, or an internal disaster.

When notified by a Monmouth or Ocean County hospital of a divert the Monmouth County Communications Center will:

- Send out Situational Awareness email to all concerned agencies
- Advise any ambulance responding over EMS to a hospital of the divert

CELLULAR TELEPHONES

Cellular telephones have become valuable tools for use by EMS agencies. But during natural and man-made emergencies the cellular telephone may become inoperable due to cell sites being overloaded by higher than normal call volume.

Do not rely on this form of communication during a mass casualty incident!

The radio system must be used for primary communications.

If at any time information is of a sensitive or confidential nature, the cellular telephone may be used to contact the Communications Center.

DO NOT CALL 9-1-1! Call 732-577-8700 to forward information to the Communications Center.

Information may also be faxed at 732-431-7103.

EMS - ANNEX #3

Monmouth County Office of Emergency Management Emergency Medical Services Strike Teams

Strike Teams are to be utilized for Mass Casualty Incidents or out of area mutual aid requests. Strike Teams are designed to respond from areas outside the regular mutual aid back up system.

Strike Teams should meet at a designated staging area near the community and respond as one unit to area which they have been assigned.

County EMS Coordinators must be advised when strike teams are utilized.

* - Coverage station is to respond to headquarters of squad noted herein and to provide coverage to all squads included in committed strike team coverage area.

** - Stand-by Squad will be dispatched to cover all calls in a coverage area.

Strike Teams are listed on following pages.

Strike Team # 1	Strike Team # 2	Strike Team # 3	Strike Team # 4
