

MONMOUTH COUNTY SHERIFF'S OFFICE

RISKS AND FACTS ON VAPING

SHAUN GOLDEN, SHERIFF

A Message from Sheriff Shaun Golden

The Monmouth County Sheriff has instituted an agency-wide commitment to excellence. The men and women who serve here are dedicated to maintaining the highest standards of professionalism and excellence in the field. We will bring together the right team, provide the most comprehensive training, and utilize the latest technology to remain among the premier law enforcement agencies in the nation.

As testament to our commitment the Monmouth County Sheriff's Office is the only county in the state to achieve "Five Star" accreditation of the Law Enforcement Division, the Corrections Division, Correctional Healthcare, the Communications Division, and the Monmouth County Police Academy. We serve as a role model to other Law Enforcement Agencies throughout the state and will continue to raise the standard of law enforcement excellence in New Jersey. Teamwork, training and technology are three essential tools the Monmouth County Sheriff's Office uses to ensure our county remains a great place to live, work and raise a family.

A handwritten signature in black ink that reads "Shaun Golden". The signature is written in a cursive, flowing style.

THIS INFORMATIVE AND EDUCATIONAL PRESENTATION WILL INCLUDE:

- **What are E-Cigarettes?**
An electronic cigarette or vape is a device that simulates tobacco smoking.
- **How do E-Cigarettes work?**
An atomizer, a power source such as a battery, a cartridge or tank filled with liquid and the user inhales vapor.
- **Nicotine, an addictive drug**
Nicotine is an addictive stimulant drug that speeds up the messages travelling between the brain and body.
- **Popcorn Lung**
Caused by a build-up of scar tissue in the lungs, which blocks the flow of air.
- **An E-Cigarette aerosol**
The "E-cigarettes do not produce a vapor (gas), but rather a dense visible aerosol of liquid sub-micron droplets.
- **Consequences and Dangers of Vaping**
E-cigarettes produce a number of dangerous chemicals including acetaldehyde, acrolein, and formaldehyde.

DID YOU KNOW?

A CDC study found that 99% of the e-cigarettes sold in assessed venues in the United States contained nicotine.

Nicotine can harm the developing adolescent brain. The brain keeps developing until about age 25.

Using nicotine in adolescence can harm the parts of the brain that control attention, learning, mood, and impulse control.

Using nicotine in adolescence may also increase risk for future addiction to other drugs.

WHAT TO LOOK FOR
